BRICKS 4 KIDZ®

we learn, we build, we play with

LEGO® Bricks

technology

Bricks 4 Kidz uses LEGO® bricks and robotics that children love, to deliver hands-on lessons related to cross-disciplinary curriculum objectives. While exploring principles of science, technology, engineering, architecture, mathematics, physics and more, children will develop problem solving and critical thinking.

Construction Craze

Put on your hard hat and head on over to our construction site! Make your own motorized models of tools of the trade from a hand-held power drill and power saw to a toughm all-terrain bulldozer and giant dump truck. Would you be surprised to learn that one of these object has a history stretching from the Stone Age to the Space Age? And who thought of making a saw blade in the shape of a circle?Where does the word bulldozer come from? How big is the biggest dump truck? Build your knowledge of construction at Bricks 4 Kidz! Dump trucks, jackhammers, drills, power saws… build motorized models of these and other powerful tools and create your own LEGO construction site. Join us for lots of high-impact learning and fun!
