

# Connecting Chromebooks to the mNB BYOD network

- 1) Have students log onto a school device (ie desktop computer in learning commons.)
- 2) Wait for Teams program to load onto desktop of the computer.
- 3) Have students log onto Teams (do NOT log into Teams from Chrome or Edge)
- 4) While student is logged into Teams, have them open their wifi connections.
- 5) Choose “mNB” from list of networks.
- 6) Set up as seen:
  - I. Change LEAP to PEAP
  - II. Change Default to Do Not Check
  - III. Enter student username under Identity (ie xxxyyy12345)
  - IV. Enter password
  - V. Click connect

Once student is connected on their Chromebook, they can log off the school device
