

Science

Suggested learning activities for the week. Pick something that interests you.

1. [Activity - Kitchen Scrap Gardening](#) : Use what you normally throw out to start your own indoor garden. Once some growth appears take a photo each week to document its progress. You can also post the pictures to our school Facebook page. (Kitchen Scrap Gardening [PDF version](#))
2. [BrainPOP](#) Activity
 - You can use our school login information to access the English site:
 - Username - robinbaird
 - Password – Kennedy#1
 - Search for “Plant Growth”.
 - Watch the video then complete the quiz. There are other activities and games to explore as well.
 - If you want, you can go on to your science Teams page and post 3 interesting facts about the video you watched.
 - **English students**
 - Suggested videos: Plant Growth, Seed Plants, Seedless Plants, Carnivorous Plants, Photosynthesis, Pollination.
 - **French Immersion students**
 - *Click on Request Free Access at the top of the main page to get access to the French site*
 - At the bottom of the page you’ll find a section that says “Visit”.
 - Below that you’ll see “BrainPOP Français”.
 - Suggested videos : Reproduction des végétaux, Plantes à graines, Plantes sans graines, Plantes carnivores, Photosynthèse, Pollinisation.
3. Science article
 - Read [Top Crops](#) to find out about a school that has a rooftop garden. Complete the questions that follow.
4. For more activities look at the ASD-N Weekly Steam newsletter. There are 3 sections by grade level (K-2, 3-5 and 6-8). This issue is all about hydroponics.
