

Vaping – Consistent Consequences across ASD-S

Justification: ASD-S is going to undertake a system-wide comprehensive approach to reduce vaping on school property, school buses and within school buildings. Beginning with directed communications in September & education within homeroom classes and appropriate subject classes in the early parts of the year, we acknowledge that involving all stakeholders in the process is critical to its success. After surveying the area high schools and their approaches to vaping, here is the proposed matrix for vaping offences in 2019-2020.
