## **Introduction**

A State of Emergency was declared in New Brunswick on March 19, 2020, due to the increased presence of COVID-19 in our province. Many businesses were closed and awaited the government's directive for re-opening procedures.

On May 8, 2020, licensed daycare and early learning facilities were permitted to re-open with additional health and safety measures effective May 19, 2020. One such measure was the creation of an Operational Plan to ensure each childcare provider is prepared to take all precautions for re-opening and continuing operations.

Creating an Operational Plan ensures workplaces have documented their risk assessment and risk mitigation measures consistent with Public Health guidance and the Occupational Health and Safety Act and regulations. Outlined below are Go-Go Group Inc's (Go-Go) plans and procedures to limit the risk of transmission and spread in Go-Go's childcare care centres.

## **Risk Reduction**

Go-Go is working diligently to limit the risk concerning the spread of COVID-19. Go-Go After School and Go-Go Preschool programs follow all guidelines outlined by Public Health and the Department of Education and Early Childhood Development (EECD). The Government of New Brunswick and the Public Health Agency of Canada state that physical distancing and effective hand and respiratory hygiene are critical preventive measures of contracting COVID-19. While physical distancing with regards to children is a challenge in group settings, Public Health and EECD have provided licensed childcare facilities with a grouping method strategy, screening practices, and other various policies and procedures to mitigate the risk. These practices are outlined below.

## ***Yellow Level Alert Policies for Early Learning and Childcare Facilities: Physical Distancing***

Go-Go After School and Preschool programs operate with a grouping system of no more than 15 children (plus staff) per group to limit interactions among larger groups of children. When more than one "grouping" is required to be within the same area, groups are kept a minimum of 2 meters (6 feet apart), with a maximum of two groupings per room as indicated in the Early Childhood Services Act. Go-Go limits children's movement between groups as much as possible and ensures grouping changes will not be made more than once per week. New groupings/bubbles can be created on PD day and storm days, as permitted by EECD.

Public Health and EECD have outlined that within 15 child groupings, physical distancing is not required. As of November 13, 2020, school-aged children (5-12) are encouraged to wear a community face mask when in common areas, even within their groupings. Common areas include school hallways, stairways, etc. Staff encourage children not to touch other children and to practice good personal hygiene. Whenever possible, Go-Go Leaders practise social distancing with the children in our programs and their families. Relief staff or other staff visiting programs must wear a community face mask, and are encouraged to physically distance whenever possible. Each day of programming begins with educating and reminding all children on proper hand and respiratory hygiene.

Go-Go staff are required to have two clean community face masks with them each day, and families are asked to send their children to Go-Go with two community face masks.

Go-Go Programs are permitted to practice emergency evacuation drills without physical distancing. Once drills have been completed, physical distance is resumed and maintained during re-entry to our facilities.

At drop off and pick up, families are asked to maintain physical distancing measures of 2 metres apart from all other children, parents, staff, and visitors, whether indoors or outdoors. Families are asked to mask when entering our childcare centres, or Head Office.

## ***Groupings and Attendance for Visitors, Staff and Children***

Go-Go Leaders maintain a confidential log of children and staff in each self-contained group of 15 and the date the group was established in addition to regular attendance records. If groups change due to increased/decreased attendance, a new group will be established. When possible, each group of children and educators will stay together.

Go-Go Leaders keep a record of all staff, volunteers, children, and visitors who work, attend or visit the facility regardless of their visit duration. Hand sanitizer is provided for any individuals required to sign in to the facility. Each child attending the facility is required to complete the Early Learning and Childcare Facility Child Profile form, which provides Go-Go with up to date contact information in the case that contact tracing is required. The confidential logs of children and staff will only be shared with Public Health to help with contact-tracing if a case of COVID-19 was found in the facility.

## **Hand and Respiratory Hygiene**

Proper hand and respiratory hygiene is vital for the prevention of spreading germs and viruses, including COVID-19. As such, Go-Go Leaders and children follow all recommended procedures when washing hands with soap and water, especially:

- on arrival;
- before and after meals;
- after using the toilet;
- after blowing nose, coughing or sneezing;
- after playing with shared toys;
- after handling animals or their waste;
- when taking medications;
- after playing outside, and;
- before and after using any outdoor playground equipment;
- before and after using play-doh, sandboxes, water tables, and ball pits.

In addition, staff are required to wash their hands:

- before and after handling food;
- after helping a child use the toilet;
- after breaks;
- before and after changing diapers; and
- before and after giving medications.

Children and staff may use alcohol-based hand sanitizers with a minimum of 70% alcohol that have been approved by Health Canada if they do not have access to soap and water, and if their hands are not visibly soiled. Hand sanitizer is kept out of reach of children, and all children are supervised when using these sanitizers.

Visitors are closely monitored and accepted on a mandatory basis only. All visitors entering Go-Go programs are required to wear a mask, wash their hands upon entering or sanitize their hands, and complete all screening procedures.

The following guidelines will also be encouraged among staff and children:

- To avoid touching the face, eyes, nose or mouth with unwashed hands.
- To cover the mouth and nose with a disposable tissue or the crease of the elbow when coughing or sneezing. Dispose of used tissues immediately and then wash hands.

All Go-Go After School and Preschool locations are equipped with hot and cold running water under pressure. Washrooms are available for children and staff, equipped with liquid soap, paper towel dispensers, toilet paper and garbage containers. Sanitization measures in Go-Go washrooms have been increased to help stop the spread of viruses or other microorganisms. Go-Go Leaders are responsible for daily cleaning and sanitization measures in their programs. All washrooms are equipped with proper handwashing signage for all children and staff to review.

## **Postings**

Go-Go programs are equipped with postings at the facility's entrance advising families of the pre-screening process and masking requirements upon entering the premises. This document reminds parents of the pre-screening requirements they are required to complete at home. Parents are responsible for pre-screening and taking the temperature of their children prior to drop-off at all Go-Go programs. Should a family member wish to enter our facility with their child, they must wear a community face mask, sanitize their hands, and sign in to the facility.

To limit the number of individuals entering the centre, only essential visitors whose entrance into the facility is necessary for operations are permitted. Individuals who have travelled outside of the Atlantic Travel Bubble (New Brunswick, Prince Edward Island, Nova Scotia and Newfoundland and Labrador) and anyone who exhibits two or more COVID-19 symptoms as outlined by Public Health cannot return until fully recovered. If tested, Public Health will inform the individual or parent when isolation may be lifted.

All Go-Go facilities are equipped with postings regarding proper hand washing for all visitors. These postings can be found at handwashing stations, in restrooms, and at our facilities' entrances. Go-Go programs outline proper hygiene and techniques for sneezing and coughing into the sleeve, elbow or a tissue.

Go-Go Leaders have increased cleaning and sanitization procedures that follow all Public Health guidelines with clear accountabilities assigned to specific staff. A cleaning and disinfection schedule is easily accessible to facility staff, Public Health Inspectors, and all Department of Education and Early Childhood Development staff, kept on-site in each program's COVID-19 related binder.

## **Go-Go Programs: Mandatory Mask Order**

As Public Health has stated that all previous mask policies for early learning childcare facilities continue to apply; children in our programs are not required to wear a mask within their community bubble of 15. However, children are encouraged to wear a community face mask while in common areas of their program, even within their grouping.

**Should families wish to enter into our programs for drop off or pick up, they are also required to wear a mask.** Any individuals who have a medical condition preventing wearing a mask will not be required to mask in our program and are encouraged to reach out to our program staff to create a pick up and drop off plan customizable to their needs.

Any families who need to visit our Go-Go Head Office will be also required to wear a mask during their visit in addition to following all pre-screening measures.

Additional information regarding the mandatory mask order can be found here on the [NB's Recovery plan](#) website.

## Screening and Monitoring

### Drop-off and Pick-up

Children are required to be pre-screened by their parents at home prior to sending them to Go-Go After School or Preschool each day. Pre-screening includes taking the child's temperature at home prior to drop-off at school, at Go-Go Preschool, and reviewing the [Screening Questionnaire for COVID-19 for Early Learning Childcare Facilities and Summer Camps](#) (Appendix A) with their child. A signed copy of Appendix A is required for each child; a blank copy is included in the Appendices section of our Go-Go After School and Preschool Parent Handbooks, and in the Appendices section of this Operational Plan. Any children exhibiting two or more symptoms of COVID-19 or are exhibiting purple fingers/toes are asked to stay home, contact 811 and cannot return to Go-Go until fully recovered. If tested, Public Health will inform the individual or parent when isolation may be lifted.

Parents are also required to complete [a Parental Confirmation and Acknowledgment of Screening Responsibility form \(Appendix E\)](#) for each child attending a Go-Go After School or Go-Go Preschool program. A blank copy of Appendix E is included in the Appendices of our Go-Go After School and Preschool Parent Handbook and in the Appendices of this Operational Plan. All forms will be kept on-site at the child(ren)'s program.

On days that a parent/guardian must drop their child off directly to Go-Go After School for PD days, storm days and day camps, parents/guardians are still responsible for daily pre-screening procedures.

#### **The following methods will be implemented for pre-screening:**

1: **Outside drop-off and pick-up** is accommodated as much as possible. Families are asked to maintain a distance of 2 metres from others during drop-off and pick-up times, both indoors and outdoors. Masks are not required during outdoor drop-off and pick-up if individuals can maintain a distance of 2 metres between themselves, other families, children and staff members. If a distance of 2 metres cannot be maintained at any time, families will be asked to wear a mask.

2: **Entering the facility** - Prior to entering our Go-Go programs, families, and others deemed essential (e.g. EECD staff) to enter the facility are required to pre-screen. Any individuals entering our programs are required to wear a community face mask. Pre-screening includes:

- [Screening Questionnaire for COVID-19 for Early Learning Childcare Facilities and Summer Camps](#) (Appendix A).
- Immediate handwashing when entering the facility.
- Sign in.

### ***When a Child or Staff Member Falls Ill***

Go-Go After School and Preschool actively monitors the health of all children, staff, and visitors in our Go-Go After School programs for the following symptoms. **Should any individual present with two or more of these symptoms, or the symptom of purple fingers or toes, they will be immediately isolated from others:**

- Fever or signs of a fever (temperatures above 37.5 degrees Celsius when taken via underarm, or 39 degrees Celsius when taken near the ear).
- Cough.
- Sore throat.
- Headache.
- Runny nose.
- A new cough or worsening of a chronic cough.
- Feeling tired.
- Diarrhea.
- Loss of taste or smell.

Note: Children or staff who have been identified as having seasonal allergies or who suffer from chronic runny nose/nasal congestion are not required to be excluded.

Isolated individuals will be directed to wait in the designated supervised isolation area with a minimum distance of 2 meters between others while arrangements for pick up can be made. Should a minimum distance of 2 meters be unable to be maintained, Go-Go Leaders will require that the individual wear a community face mask until they exit the building to decrease transmission risk. Any area that an isolated child/staff member has been placed in will be immediately sanitized upon pick-up or departure.

**All parents/guardians are required to pick their child up within 1 hour of being notified of their child meeting their exclusion criteria. Parents are also required to send a community face mask for their child that will remain in their book bag unless needed.** Go-Go After School and Preschool will stock community masks and gloves at each program. Go-Go Leaders will report to their Childcare Manager should they have less than five community masks remaining on-site. Childcare Managers are responsible for ensuring that the program is stocked with adequate supplies. Public Health will notify the Go-Go program if a child or staff has a positive COVID-19 result.

If an outbreak is declared at one of our Go-Go After School or Preschool locations, the Go-Go program in question will close, and all attending individuals attending the Go-Go program will be asked to self isolate for 14 days. Notices will be posted at all entrances to the Go-Go program to ensure that information is available for staff and parents/guardians as well. Regional Public Health will be involved in managing the outbreak and ensuring contacts are identified, Public Health measures are in place, and will lead any required communication. Public Health will also advise and approve when the Go-Go After School or Preschool program can re-open. This information will be communicated to all families as soon as it becomes available.

## **Transportation & Outings Protocol**

Go-Go After School follows all Public Health and EECD guidelines around transportation, field trips and special visitors. As of August 18, 2020, field trips and outings are permissible, providing the protocols outlined below are followed. At this time, parent/guardian speakers, birthday gatherings, and holiday events are not permitted.

When Go-Go offers transportation from schools to programs, the following protocols apply:

- Go-Go Bus Drivers and Leaders self-assess prior to arriving at their programs.
- When children are loading and unloading, all individuals will remain at least 1 metre apart.
- During transportation, children and staff are not required to wear a mask if seated in their facility grouping and are allowed to sit up to 3 to a row. If facility groupings cannot be maintained during transportation, children and staff are directed to wear masks. In these cases, children will be placed in their facility groupings upon arrival and may then remove their masks.
- Children are directed to wash their hands before leaving upon arrival to their program.
- All Go-Go vehicles are cleaned and disinfected at the end of each completed trip.
- Go-Go keeps a record of transportation, including the following: date, time and duration of travel, travel location, transportation method and a list of passengers for contact tracing.

When Go-Go offers transportation for field trips, the following additional protocols will also apply:

- During outings/field trips all groupings will be maintained, and places, where physical distancing of 2 metres cannot be maintained will be avoided.
- Go-Go Leaders direct children to wash their hands before leaving for outings/field trips and upon their return to the program.
- Go-Go Leaders also direct children to fill their personal water bottles before leaving the program.
- Staff members bring a supply of hand sanitizer with them in their first aid kits for children to sanitize their hands once they arrive at their destination.

## **Payments**

Go-Go will continue to use direct debit as its main avenue of payment collection for all Go-Go services. Should families wish to make other payment arrangements, please contact the Head Office. Please note, Go-Go does not allow any payments to be made at any of our childcare centres and does not accept cash payments.

## **Records**

As required by EECD, a household contact form is kept on-site to be completed by families upon returning to the program. The contact form includes any roommates, relatives that share a home with that child, etc. Should a child have multiple homes, the information will be requested for members of each household.

Staff and visitors are required to sanitize their hands and sign in upon entry, stating their name, date, time, and contact information if not already on file. This file is kept on-site at the Go-Go program in the Operational Resource Binder and provided to Public Health if necessary.

## ***Cleaning and Disinfecting***

Cleaning and disinfecting protocols are a part of ensuring our environments are clean and accessible for all children. Although these protocols are effective in disease control, Go-Go has increased the frequency of cleaning and disinfecting high-touch surfaces to control the spread of viruses and other microorganisms. Go-Go Leaders are assigned cleaning schedules and are held responsible for this schedule by their corresponding Childcare Manager. All surfaces are cleaned a minimum of once daily by Go-Go Leaders. Additional cleaning measures apply to frequently touched surfaces, including door knobs, handrails, light switches, taps, and hand sanitizer dispensers cleaned by our Go-Go Leaders on-site. Frequently touched surfaces are cleaned a minimum of twice daily and when soiled. Toys that children may put in their mouth will be rinsed with potable water after being cleaned and disinfected. Go-Go Leaders keep a log of cleaning responsibilities with them in their COVID-19 binders at each program.

Go-Go uses Buckeye Sanil-Q2 (Quat) to disinfect, with active ingredients Benzalkonium Chloride, Didecyl Dimethyl Ammonium Chloride, Dioctyl Dimethyl Ammonium Chloride, Octyl Decyl Dimethyl Ammonium Chloride to sanitize all hard surfaces and toys. Bleach kits are also available as needed; however, Quat is removed from programs when bleach kits are utilized.

Go-Go Leaders maintain an on-site supply of hand sanitizer, toilet paper, paper towel, garbage bags, soap, and cleaning disinfectant. When this supply is running low, they request additional supplies from their Childcare Manager. The Childcare Manager makes arrangements to ensure that all required supplies are available to their Go-Go programs as needed.

## ***Indoor & Outdoor Environments***

Increasing the frequency of cleaning and disinfecting high touch surfaces is a key component in combating the spread of illness. Surfaces that are touched by large groups of people such as doorknobs, light switches and faucets are cleaned more frequently.

As per the advisement of Public Health and the Department of Education and Early Childhood Development, Go-Go childcare centres have also made the following change to their indoor and outdoor environments to decrease the risk of transmission among children via surface transmission:

- Temporarily removed dress-up clothing, hats, costumes, other fabric, and materials.
- Provided additional outdoor equipment to reduce sharing.
- Increased cleaning and sanitation of high touch surfaces.
- Staggered playtimes with groupings of 15 or less to promote proper social distancing.
- Easily disinfected items such as plastic toys are permitted to be shared between groupings following proper sanitization before and after use.
- Cardboard items such as puzzles and board games are permitted to be shared between groups following a 72 hour quarantine period in which items are placed in a sealed container or bag.
- Allowed use of play-doh; each child must have their own individual modeling material stored in individual bins or cubbies, to be discarded and replaced weekly.
- Allowed use of water tables; water must be discarded after each use, and all toys and containers sanitized at the end of the day.

- Allowed use of indoor ball pits in Preschool programs; must be disinfected at that end of the day.
- Any item that is placed in a child's mouth must be disinfected immediately.

Additional changes for outdoor playground use:

- Allowed use of playsets (both private and municipal that have been opened with mandatory hand washing before and after playing with equipment.
- Reminders for children to avoid touching their face with their hands during playtime.
- Allowed use of sandboxes; sand must be replaced every two weeks.

### ***Staff Absence Policy***

Staff are required to stay home from work when sick. Unpaid sick time is provided to staff when they require time off due to illness. Go-Go staff will complete the process of calling in sick for work as outlined in the Go-Go Group Inc. Employee Handbook. Prior to returning to work, staff will ensure they have completed all exclusion criteria to do so.

Staff are required to complete a self-assessment for pre-screening prior to leaving home. Should they not meet the outlined requirements, they are required to contact their Childcare Manager before starting their shift and any staff who are exhibiting two or more symptoms of COVID-19 are asked to stay home, contact 811 and cannot return until fully recovered. If tested, Public Health will inform the staff member when isolation may be lifted.

### ***Personal Belongings***

Go-Go requests that all toys and unnecessary personal belongings remain at home to lower the risk of transmission. Hats, mitts and scarves, sunscreen, change of clothes and water bottles can be sent with children each day but must be labelled and remain in the child's book bag when not in use. Except for a child's indoor shoes, personal belongings (e.g. sweaters, coats, hats, mitts, etc.) will not be permitted to be stored on-site.

For parents with children in our Preschool program requiring naps throughout the day, Go-Go asks that their personal napping supplies (pillow, blanket, etc.) be washed weekly.

**Parents are requested to send two community face masks for their child(ren) to be kept in their book bags.** These masks will be used when a child falls ill or meets any portion of the outlined exclusion criteria and a two-metre distance cannot be maintained while arrangements for pick up can be made.

### ***Travel Between Orange and Yellow Alert Zones***

Any individuals travelling between Orange and Yellow alert zones must self monitor and wear a community face mask for 14 days. Individuals must follow all directives in accordance with the Mandatory Order as if they were in the orange phase. This applies to Go-Go staff, children, and their families.

### **Orange Level Alert Policies for Early Learning Facilities:**

Go-Go operates child care centres in Zone 2 and Zone 3 (Fredericton and Saint John regions). Should the Province of New Brunswick, or one of these zones move to the Orange level of recovery, new policies and procedures will be in effect until the zone returns to the Yellow phase of recovery. Outlined below are the current standards set forth for the Orange alert level by the Department of Education and Early Childhood Development. These policies would be effective immediately once the aforementioned zones are designated Orange level(s).

#### **Physical Distancing & Community Face Masks- Orange Level**

**School-aged Children:** All children aged 4 and up are required to wear a mask at all times, except during physical activity and while eating and drinking, both indoors and outdoors.

**Preschool Children:** For children between the ages of 2 and 4, masks are required in common areas such as hallways, however are not required within their bubble (outside of common areas). Go-Go Preschool Educators will supervise children when putting on and removing their masks.

**Staff:** Go-Go staff are required to mask under the Orange alert level both indoors and outdoors, except when eating or sitting alone in a closed office or classroom.

Staff and children are required to wear a mask during transportation to and from Go-Go programs, whether on the school bus or the Go-Go bus. Children and staff are expected to bring two clean community masks to the Go-Go Program with them each day.

#### **Changes to Grouping- Orange Level**

During the Orange level, changes to groupings will not be made until the zone transitions back to the Yellow phase of recovery. New registrations and enrollment are permitted in an Orange Level alert.

#### **Screening and Monitoring: Drop Off and Pick Up - Orange Level**

Active screening is required for all those entering Go-Go programs, whether staff or children. Any child, staff member, essential visitor (Public Health, EECD, WorkSafe NB) who presents with symptoms will be required to stay home and call 811. Prescreening requirements will be posted at each Go-Go program and instructions will be in place with guidelines to access the centre.

During the Orange alert level, parents/families are not permitted to enter the Go-Go program. Each location will have instructions as to how pick up and drop will take place specific to that Go-Go Program.

#### **Field Trips- Orange Level**

During the Orange phase of recovery, Go-Go programs will not be participating in any field trips for the duration of time the Orange Level alert is in place.

## ***Assessment and Implementation of the Operational Plan***

Go-Go's Operational Plan is provided to each staff member, and a copy is available at each program for Go-Go Leaders to refer to. Staff members must attend virtual training sessions relating to Go-Go's Operational Plan and sign off that they have read and understood the information herein. Each childcare program is assigned to a Childcare Manager; the Childcare Manager is responsible for the implementation, training, and monitoring of the outlined policies and procedures contained in this operational plan.

The safety and health of our staff, children, and Go-Go families are our greatest priority. Should a family member, staff, or child have a concern with the implementation of any of our practises/procedures outlined in this document, we ask that they please reach out to our Go-Go Head Office by phone at 455-5496, or by e-mail at [afterschool@gogogym.com](mailto:afterschool@gogogym.com), or [preschool@gogogym.com](mailto:preschool@gogogym.com) to speak with their program's Childcare Manager. The Childcare Manager will follow up with each concern and work with staff, children, and parents to resolve all concerns.

Creating a safe and healthy environment in these unprecedented times is a task that we could not do without the support. We thank you for your efforts as we work to lower the risk of COVID-19 together.

## Appendices

### Appendix A: Screening Questionnaire for COVID-19

# ATTENTION

If you answer **'YES'** to any of the following questions, **DO NOT ENTER** this building. Please return home and self-isolate.

- Do you have **TWO (2)** of the following symptoms that are not related to a known pre-existing health condition (i.e., seasonal allergies)? If **YES**, you should be tested for COVID-19.

Fever

Cough (or worsening cough)

Diarrhea

Loss of sense of smell and taste

In children, purple markings on the fingers and toes

Runny nose

Sore throat

Muscle pain

Headache

Fatigue/  
exhaustion

- Have you been advised by Public Health, a health-care provider or a peace officer that you are currently required to self-isolate?
- Are you waiting for a COVID-19 test or COVID-19 test results AND have been told you need to self-isolate?
- Have you travelled outside of the Atlantic bubble in the past 14 days (unless exempt from self-isolation)?
- Has an individual in your household returned from outside of the Atlantic bubble in the past 14 days for any reason, and now someone within the household has developed one or more symptoms of COVID-19 as listed above?

If you answered **'NO'** to the above questions, **YOU MAY ENTER** the facility.

If you are experiencing any symptoms, you should get tested. You can register for a test online by clicking 'Get tested' on the GNB Coronavirus website, calling Tele-Care 811 or by contacting your primary health-care provider.
