I'm Sally, and I'm excited to help you learn more about our amazing solar system. Should we talk about recent Mars missions? Or is there something else you'd like to explore?

Quiz me on the moons of Jupiter!  
I'm trying to learn them all.

I love it! Let's start with the basics.  
How many moons does Jupiter have?

A) 100

B) 95

C) 36

I know it officially has 95, but there are many more objects orbiting the planet.
