

The New Brunswick Routine Immunization Schedule is set by the Chief Medical Officer of Health. Vaccines recommended in the Routine Immunization Schedule are provided by Public Health and other health-care providers throughout New Brunswick. "On time" and "on schedule" immunization provide the best protection against vaccine preventable diseases.

## Routine Childhood Immunization Schedule

Age/Grade	Vaccine
Birth	Hepatitis B
2 months	Hepatitis B DTaP-IPV-Hib <sup>1</sup> Pneumococcal conjugate
4 months	DTaP-IPV-Hib Pneumococcal conjugate
6 months	Hepatitis B DTaP-IPV-Hib
12 months	MMR (measles, mumps and rubella) Varicella (chicken pox) Meningococcal conjugate C Pneumococcal conjugate
18 months	DTaP-IPV-Hib MMR Varicella
6 months to 18 years	Influenza (yearly)
4 years	DTaP-IPV <sup>2</sup>
Grade 7	HPV <sup>3</sup> (girls only)
Grade 9	Tdap <sup>4</sup> Meningococcal conjugate ACYW-135

## Targeted / Catch-up Immunization Campaigns for Children and Adolescents

Age/Grade	Vaccine	Start Date	End Date
Grade 12	MMR	2007-08 school year	2012-2013

## Routine Adult Immunization Schedule

Age	Vaccine
Adulthood	Td (tetanus and diphtheria) should be given every 10 years. Tdap <sup>4</sup> should replace one of the Td doses.
≥65 years	Pneumococcal polysaccharide
65 years and older	Influenza (yearly)
Adults born after 1970 should contact their health-care provider or Public Health office for information about MMR immunization.	
Influenza vaccine is recommended for all residents of New Brunswick six months of age and older. It is provided free of charge to those at increased risk of complications from influenza, including those 65 years of age and older. Please consult your health-care provider or Public health office for more information on others eligible for publicly funded influenza vaccine.	

<sup>1</sup> DTaP-IPV-Hib: diphtheria, tetanus, acellular pertussis, inactivated polio, & Haemophilus influenzae type b

<sup>2</sup> DTaP-IPV: diphtheria, tetanus, acellular pertussis, inactivated polio

<sup>3</sup> HPV: human papillomavirus

<sup>4</sup> Tdap: tetanus, diphtheria & acellular pertussis
