Parent/Guardian Name: _____

Parent/Guardian Signature: _____

GIRL'S CLUB

Join us for tons of Science and Engineering Fun!

We are so excited for another season of Girl's Club at Bliss Carman Middle School!

Important Dates

February 7th, 2017
Meeting #1

March 14th, 2017
Meeting #2

April 4th, 2017
Meeting #3

Date TBA
UNB Adventure Day of Labs, Experiments and other STEM Challenges with Female UNB Professors & Students!

Due to unfortunate stereotypes, it is sometimes believed that science and engineering (and the careers that involve these disciplines) are “for boys” and that girls aren’t able to or shouldn’t be interested in them!

For the past several years, Worlds UNBound has been working hard to dismantle this stereotype and create a fun and inviting atmosphere for girls to learn about science and engineering!

One of the main initiatives we use to spread this idea is our Girls Club program. In schools across and Fredericton and in surrounding areas, we carry out monthly, hands-on science and engineering activities over lunch hours to promote science and engineering, leadership and confidence in female students. These activities are run by current science and engineering students at the University of New Brunswick all of which are focused on showing girls that they are extremely relatable and are strong models for young girls to aspire to be!

If your daughter is interested in being a part of your school’s Girls Club, please return the registration sheet to your daughter’s class by **January 23rd, 2017**.

1. There is a \$5 fee associated with the club for material costs.
2. Due to material restrictions, there are only 35 spots, so register today to reserve your place!
