

Application Process

The John Tidswell Summer Internship 2022

The Biology Department at the University of New Brunswick in Fredericton is once again fortunate to offer a current Grade 12 student, who will be pursuing a Biology undergraduate degree from the University of New Brunswick in Fredericton (Fall 2022), the opportunity to gain valuable research experience (while being paid) through the John Tidswell Transitional Summer Internship in Biological Research.

Last year's recipient found the Internship to be beneficial in providing experience in a research setting and becoming familiar with the Department of Biology and the University campus prior to the fall start-up.

If you have any questions please feel free to contact:

**Margaret Blacquier – Administrative Assistant

This Transitional Summer Internship in Biological Research is generously supported by John Tidswell, a former employee and continuing contributor to the Department of Biology at the University of New Brunswick in Fredericton. Throughout his career John has been committed to taking the University to high schools in order to better prepare students for their transition to higher education. This internship is designed to accelerate that process by providing a deserving student with the opportunity to work directly in a research setting in Biology at UNBF prior to starting his/her university degree.

The internship provides a student with eight weeks of salary support during the months of July and August. The successful applicant will be introduced to our research environment by actively participating in a project(s) that best suits his/her interests.

Eligibility:

This internship is open to all graduating grade 12 students who will be initiating a degree in Biology at UNBF in September of the same year. Students interested in the internship must apply to the Department of Biology **by 4:00 p.m., Friday, May 6, 2022** providing a resume, transcript of marks, and a letter outlining his/her key interests and career aspirations in the biological sciences. Selection of the successful candidate will balance all the previous items equally. Send your application package to:

**Dr. Dion Durnford, Chair & Professor
c/o Margaret Blacquier
Department of Biology
University of New Brunswick
P.O. Box 4400
Fredericton, N.B. E3B 5A3**

Other Requirements:

The successful candidate will provide a short report on his/her summer experience to the major donor summarizing the research activity and how it has helped to prepare him/her for the academic year.

Application Process

The Indigenous Student Summer Internship 2022

The Biology Department at the University of New Brunswick in Fredericton has initiated a new summer internship to promote the participation of an indigenous student in the biological sciences. The internship will be offered to a current Grade 12 student who will be pursuing a Biology undergraduate degree from the University of New Brunswick in Fredericton (Fall 2022). The internship provides an opportunity to gain valuable research experience (while being paid) and to become familiar with the Department of Biology and the University campus prior to the fall start-up.

The Indigenous Student Summer Internship is generously supported by the Department of Biology at the University of New Brunswick in Fredericton and by participating faculty researchers. This internship is designed to accelerate a student's familiarity with a university setting in general and the biology department in particular. The deserving student will work in a number of different labs and will therefore be exposed to a variety of biological disciplines and kinds of research activities, prior to starting his/her university degree.

The internship provides a student with eight weeks of salary support during the months of July and August. The successful applicant will be introduced to our research environment by actively participating in a project(s) that best suits his/her interests.

Eligibility:

This internship is open to all indigenous graduating grade 12 students who will be initiating a degree in Biology at UNBF in September of the same year.
