

## ***The John Tidswell Summer Internship 2018***

The Biology Department at the University of New Brunswick in Fredericton is once again fortunate to offer a current Grade 12 student, who will be pursuing a Biology undergraduate degree from the University of New Brunswick in Fredericton (Fall 2018), the opportunity to gain valuable research experience (while being paid) through the John Tidswell Transitional Summer Internship in Biological Research.

Last year's recipient found the Internship to be beneficial in providing experience in a research setting and becoming familiar with the Department of Biology and the University campus prior to the fall start-up.

If you have any questions please feel free to contact:

## ***Application Process***

This Transitional Summer Internship in Biological Research is generously supported by John Tidswell, a former employee and continuing contributor to the Department of Biology at the University of New Brunswick in Fredericton. Throughout his career John has been committed to taking the University to high schools in order to better prepare students for their transition to higher education. This internship is designed to accelerate that process by providing a deserving student with the opportunity to work directly in a research setting in Biology at UNBF prior to starting his/her university degree.

The internship provides a student with eight weeks of salary support during the months of July and August. The successful applicant will be introduced to our research environment by actively participating in a project(s) that best suits his/her interests.

### **Eligibility:**

This internship is open to all graduating grade 12 students who will be initiating a degree in Biology at UNBF in September of the same year. Students interested in the internship must apply to the Department of Biology **by 4:00 p.m., Friday, April 6, 2018** providing a resume, transcript of marks, and a letter outlining his/her key interests and career aspirations in the biological sciences. Selection of the successful candidate will balance all the previous items equally. Send your application package to:

**Dr. Stephen Heard, Acting Chair & Professor  
c/o Margaret Blacquier  
Department of Biology  
University of New Brunswick  
P.O. Box 4400  
Fredericton, N.B. E3B 5A3**

### **Other Requirements:**

The successful candidate will provide a short report on his/her summer experience to the major donor summarizing the research activity and how it has helped to prepare him/her for the academic year.
