

Quiz outline – 5 senses

Quiz date: Wednesday, December 21st, 2022

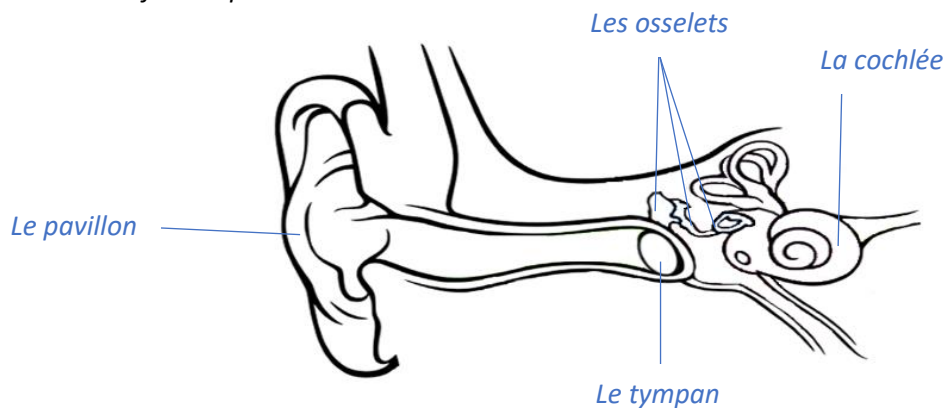

In order to be successful on the quiz, students are responsible for the following information:

- 1) **Organs** – Students should be able to name the organ associated with each of the 5 senses (ex. *Le nez est l'organe de l'odorat*).
- 2) **Actions** – Students should be able to name the action associated with each of the 5 senses (ex. *L'action de l'odorat est sentir.*)
- 3) **Parts and Functions** – Students should be able to match each body part with its corresponding function. Students will not be asked to memorize the functions and be able to write them out independently but should be able to recognize them.

Ex. *Le pavillon – Collecte et amplifie les sons*

- 4) **Diagrams** – Students will be expected to label the main parts of each organ associated with the 5 senses (**except touch**). Drawings will be provided but students will need to add labels.

Ex. *Identifiez les parties de l'oreille*

- 5) **Sensory Pathways** – Students will need to be able to name the parts of each organ in the order that they are used to connect the stimulus (ex. Food, sound, light, odor etc.) to the brain. **This will NOT be assessed for the sense of touch as it has a less linear pathway.**

Ex. *Le gout*
