The program provides selected students with a summer job of up to ten weeks in duration with a New Brunswick employer between May 1 and the Friday following Labour Day.

Program objectives

- Provide students with an experiential learning opportunity.
- Help students develop and build transferable skills and/or find employment in their field of study.
- Provide a wage subsidy to employers to help them provide quality summer employment to students.
- Enhance students' employment prospects upon completion of their studies.
- Enable students to finance the continuation of their education.
