

Park Street After School Opportunities

December 13, 2016

Park Street is pleased to partner with Science East in offering an enriched afterschool opportunity called “Creating with Code.” Designing with code and creating games and animations are just some of the activities students will explore in their pursuit of learning about **Science, Technology, Engineering, and Math (STEM)** during this after school program. When young students engage in **STEM** they gain the confidence to investigate their world, understand challenges, and design solutions.

The purpose of this program is to give students, with any skill level, the opportunity to discover coding as a tool that they can use to solve problems and produce results. No experience necessary.

Science East is the most active public science and technology educational organization in New Brunswick. Science East is a registered charity that works both inside and outside of the school system to reach students, teachers, families, businesses and communities in every region of the province. We provide quality, inquiry-based learning for students, meaningful and engaging workshops for teachers and professionals, as well as fun and educational activities for the public. Our mission is to inspire and inform through hands-on science experiences.

The club will run each Monday on the following dates: Jan. 23rd, Jan 30th, Feb 6 and Feb 13th from 3:15 – 4:15.

Due to the nature of the activities, the organizers are currently only opening the after school club to 12 students. We will collect application forms until December 22, at which time we will do a lottery draw for participants if there is great interest.

If your child is interested in participating in this club “Creating with Code”, beginning on Monday, January 23, please complete the form below and return it to the office no later than, Thursday, December 22.

I give my child _____ in _____ class to participate in the enriched afterschool **Creating with Code** opportunity from 3:15 – 4:15 at Park Street School beginning for 4 weeks on January 23, 2016.
