BEES

Facts that Sierra & Kursten found: 1 in 3 bites of food we eat, we wouldn't have without bees; bees help make medicines that keep us feeling good; we need bees to help flowers grow; bees make honey that we eat and use in shampoo and soap.

What other facts did you learn from the video?

Help The Bees

You can get free seeds from Cheerios by clicking [HERE](#), or Mme Amanda can mail you some that Veyseys donated to our class. Email me if you would like some seeds mailed to you.

HERE ARE SOME EXPERT TIPS FROM OUR PARTNER:

- 1 Choose a sunny location to plant your seeds (when in bloom your sunflowers will face east).
- 2 Plant seeds 1" in the ground, and 18"-24" apart. If planting more than one row, plant rows 30" apart.
- 3 Keep moderately moist until germination (10-14 days).

More Book Choices

All the book club books (except House Arrest, which is [here](#)) can be read aloud to you on Soraapp.com, you can also get the free Sora App. For your school name, use the one in the picture below. Sign in using your Office 365 email/password. With Sora you can download a book when you have internet, and then listen to it ANYWHERE! Click here to visit Soraapp.com.

Don't forget about [EPIC!](#) Check your mailbox for recommendations!

Book Clubs

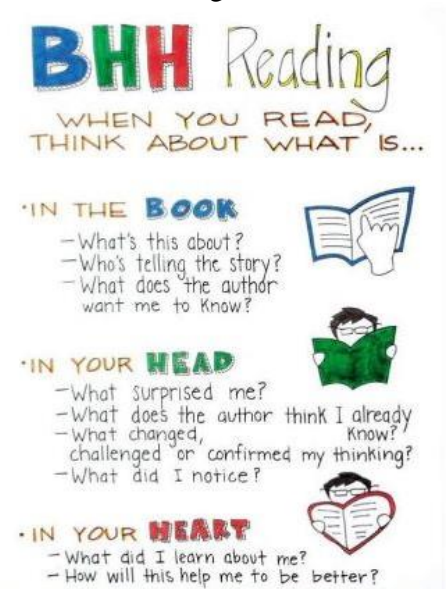

Book Clubs start in June. Please wait until then to start your new book! If you have internet, please try using Flip Grid. It is very easy to use. Click on the photo below, enter our Flip Code wardparish2020 and then choose "Login with Microsoft" and enter your Office 365 email/password.

Did you find your BHH bookmark in with your school supplies? Ask these questions to improve your reading! Answer some of these questions for writing this week.

WHICH ONE DOESN'T BELONG?

Find a reason why each one does not belong.

Magic Math Trick

1. Think of a whole number 1 through 10
 2. Double it!
 3. Add 4
 4. Divide by 2
 5. Subtract the original number
- Is the numeral 2?!

Begin with a different number do you get the same answer, why? Try a number greater than 10. Can you still see the magic?

Make 25 with 5 Players are dealt five cards each and the remaining cards are stacked face down in a pile in the middle of the table. Players must use all five cards to create a sum of exactly 25. Players go around in a circle and on each turn, they pick up a new card either from the face-down pile or from the discard pile. Players discard one card per turn. 1st player to create a sum of 25 wins.

Change it up: Make the game more challenging by changing the rules to include, or even exclude, certain operations. You can start by allowing subtraction, then bringing in multiplication and division.
