**Subject:** RE: McAdam Question

David:

The following are the invoices submitted to the District for water and sewer since 2012;

2012 - \$11,255.41 (sewer) and \$1656.60 (water)  
2013 - \$ 11,255.41 (sewer) and \$2145.39 (water)  
2014 - \$11,705.63 (sewer) and \$1613.30 (water)  
2015 - \$12,642.55 (sewer) and 1866.30 (water)

The sewer rate is a combined rate for both schools - the increases are based on a percentage yearly and I am not sure how the department breaks down the charges pertaining to each school. The water is metered and the water consumption since 2012 for the McAdam Elementary School is \$2,837.87 which is broken down on the invoices that are sent from the office. The rate increase from 2013 of \$3250 and \$6570. showing in the report was done by the department.

If you require any further information, please contact me.  
Thanks and have a nice day!

**Subject:** McAdam Question

Hi Frank and others,

Could you have a look at the question on the McAdam sustainability site regarding the potential savings for water and sewage? Perhaps you could help with some clarification that might change the numbers we are projecting. Thank you.

David
