

Dear Residents of Perth-Andover,

We would like to invite you and anyone that may be interested to attend a community workshop at 6:30 pm, on Thursday, May 10th at the River Valley Civic Centre. This workshop will assist Council in the development of an action plan to reduce greenhouse gas emissions in our community.

The Village of Perth-Andover has been working on the development of a community action plan that would help our community realize our Green House Gas inventories and then develop a Local Action Plan for emissions reduction.

In summary, the Local Action Plan's objective is to provide tools and ideas to:

1. Reduce GHG emissions
2. Reduce energy consumption / lower energy cost
3. Identify projects helping to create a smart environmental & energy Village

Perth-Andover is one of eleven municipalities in New Brunswick participating in this program through the Union of Municipalities of NB. This is the first initiative in Canada grouping eleven municipalities aiming to realize GHG Inventories, Local Action Plans including a CEP approach.

If you have any questions please do not hesitate to contact our office at 273-4959. Hopefully, you are able to attend and we look forward to your input!

AGENDA
