2020 -2021 WHS COURSE SELECTION PLANNING GUIDE - Grade 12

1. Check that you have passed all Grade 9 and 10 courses. You should check your report card and transcript. If you have questions, please check with WHS guidance counselors or an administrator. Ask questions because we are here to help you.
2. Check that you have passed all compulsory credits that are required for graduation. The graduation requirements and compulsory credits are outlined on the bottom of the sheet. WHS guidance counselors and administrators encourage students to take compulsory courses in grade 11. This gives you an extra year to make sure you meet graduation requirements.
3. Remember that you also need 17 from a possible 21 credits to graduate. Grade 9 and 10 courses do not count as credits.
4. Only two local option courses can be counted in the 17 credits required for graduation. WHS local options include Yoga 110, Agriculture Science 120; and Exercise Science 120.
5. Choose your courses from the course descriptions. You can always check with WHS teachers if you have questions or concerns. Remember to check that you have the prerequisites that are listed in the booklet. You need to consider your future plans. Check out the Pathways for Math, University, or Community/Private Colleges. What courses do you need to take for future study? What courses are interesting? Identify the English course that you want and then list the courses you plan to register for in the spaces below. You must have five (5) courses at Grade 12 level. This includes English. You need to choose ten (10) courses plus four (2) alternates. Please check the note on the reverse of this page regarding scheduling conflicts and availability of courses.

1. English _____ 7. _____
2. _____ 8. _____
3. _____ 9. _____
4. _____ 10. _____
5. _____
6. _____

Please select two alternate courses:

1. _____
2. _____
