

"Enrichment"... what does it mean?

- Enrichment deals with appropriate additions to the current curriculum.
- It emphasizes creative activities and/or experiences.
- It's exposing students to new experiences.
- The goal is for students to learn new concepts and skills.
- Provided at three different levels: classroom, school and district.

"...any learning experience that replaces, supplements, or extends instruction beyond the boundaries of the course content, textbook, and the classroom and that includes depth of understanding, breadth of understanding, and relevance to the student and to the world in which he/she lives."

(Clendening & Davies, 1983)
