

COVID-19 OPERATIONAL PLAN FOR SCHOOLS

To ensure each school environment safely applies risk mitigation measures consistent with Public Health guidance and the *Occupational Health and Safety Act* and Regulations. All schools, and district offices, must develop a written COVID-19 Operational Plan to provide the safe environment needed for students and staff. Refer to the *Return to School, September 2020* document and its appendices for primary support for the requirements listed below. This completed document shall be submitted to Clare Tooley, clare.tooley@nbed.nb.ca for review by August 26th, 2020. It will then be signed off by Zoë Watson or John MacDonald and returned to the principal for implementation and distribution.

The following document is intended to provide a check list with spaces for each main topic area along with resources. This will help the plan owner, (school Principal), outline each school's Operational Plan. Communication plans must consider and include staff, students, parents/guardians, visiting community professionals, and public. The District Occupational Health and Safety Coordinator is expected to be the primary support for staff and students. School Joint Health and Safety Committees (JHSCs) should be considered integral to preparations and support for September operations and beyond.

COVID-19 OPERATIONAL PLAN FOR SCHOOLS

Section 1 - RATIONALE – Effective Risk Mitigation – Infection and Prevention Controls

The best prevention controls in a school/district are achieved by first focusing on recommended physical distancing requirements and taking every reasonable step to configure the physical site to apply an appropriate physical distance between people. All must practice appropriate hand hygiene and cough / sneeze etiquette. Once all reasonable options in a category have been exhausted, move to the next category. Refer to table below for clarification.

In addition to the guidelines and regulations, everyone in the school is responsible for ensuring their own safety and the safety of all others.

Visible signage with clear messaging is a key component to effective communication in the prevention and control of COVID-19.
